Copyright

Other than for strictly personal use, it is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), unless the work is under an open content license (like Creative Commons).

The publication may also be distributed here under the terms of Article 25fa of the Dutch Copyright Act, indicated by the "Taverne" license. More information can be found on the University of Groningen website: <https://www.rug.nl/library/open-access/self-archiving-pure/taverne-amendment>.

Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

Acknowledgements

In the summer of 2002, I attended to the Young Scientists Summer Programme of IIASA. The Dynamic Systems (DYN) project introduced me to the optimal control theory. I am very grateful for the pleasant and fruitful cooperation with the DYN-project. Particularly, I would like to thank Dr. S.M.Aseev, who has contributed greatly to the mathematical formulation in appendix 3.8.
